THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

1. This Office Action is in response to the Ex Parte Quayle Action filed on 3/25/2009. Claims 1-7 are canceled, claims 8-16 are pending.

Allowable Subject Matter

2. After further search and thorough examination of the present application and in view of the prior art of record, claims 8-16 are found to be in condition for allowance.

Reason for Allowance

3. The following is an examiner's statement of reasons for allowance: The present invention relates to a quantum key distribution method capable of correcting a data error using an error correction code and a communication apparatus capable of realizing the quantum key distribution.

To achieve this inventive goal, independent claim 8 identifies the distinct features "the transmission-side communication apparatus notifying the reception-side communication apparatus of additional second error correction information generated based on a third parity check matrix and the transmission data, via the public communication path, the third parity check matrix, which is identical in both of the communication apparatuses, corresponding to a coding rate lower than a last coding rate, and being extracted, when the error of the reception data is not completely corrected, from the first parity check matrix such that last error correction information becomes a part of information at a time of next error correction; second error correcting including the reception-side communication apparatus correcting the error of the reception data based on the first error correction information and the second error correction information; and encryption-key generating including, when the error of the reception data is

Art Unit: 2112

completely corrected at the first error correcting or when the error is completely corrected by repeatedly executing the second check-matrix generating, the second error-correction-information notifying, and the second error correcting, discarding a part of shared information according to an amount of opened error correction information; and setting a result of the discarding as an encryption key.”

Independent claim 13 identifies the distinct features “an encryption-key generating unit that discards a part of the shared information according to an amount of opened error correction information and sets a result of discarding as an encryption key, when the error of the reception data is completely corrected, wherein the decoding unit corrects the error of the reception data based on a third parity check matrix and error correction information added from the transmission-side communication apparatus via the public communication path, the third parity check matrix, which is identical in both of the communication apparatuses, corresponding to each coding rate, and being extracted, when the error of the reception data is not completely corrected, from the first parity check matrix such that last error correction information becomes a part of information at a time of next error correction while decreasing the coding rate.”

Independent claim 15 identifies the distinct features “an encryption-key generating unit that discards a part of the shared information according to an amount of opened error correction information and sets a result of discarding as an encryption key, when the error of the reception data is completely corrected, wherein the error-correction-information generating unit notifies the reception-side communication apparatus of additional error correction information via the public communication path until the error of the reception data is completely corrected, based on a third parity check matrix, which is identical in both of the communication apparatuses,

Art Unit: 2112

corresponding to each coding rate, the third parity check matrix being extracted, when the error of the reception data is not completely corrected, from the first parity check matrix such that last error correction information becomes a part of information at a time of next error correction while decreasing the coding rate.”

The first cited reference, Nambu (U.S. Pat. No. 6,801,626) discloses a cryptographic key distribution using light pulses of three macroscopic quantum states. The second cited reference Townsend (U.S. Pat. No. 5,768,378) discloses a key distribution in a multiple access network using quantum cryptography.

However, the features disclosed in the instant application (No. 10/588,787) are neither anticipated nor render obvious by the prior art of record.

These limitations, in conjunction with all other limitations of the base claims were not shown by, would not have been obvious over, would not have been fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
